Professional Summary

Data-driven professional with expertise in machine learning, Power BI, SQL, Python, and MLOps. Background spans healthcare (MSc Health Informatics), retail operations, and hospitality leadership. Delivered measurable impact through predictive modelling, forecasting, dashboards, and cost optimisation (93% AUC-ROC flight delay model, 70% beverage cost reduction, 300% sales uplift). Seeking Data Analyst, Data Scientist, or MLOps roles to apply technical skills and domain knowledge for business results.

Professional Experience

Head Waiter

Mariage Freres, London, UK

December 2025 – Present

- Led daily service operations in a luxury tea salon, coordinating table management and delivering high-quality experiences for 70+ international guests per shift across lunch, afternoon tea, and dinner.
- Trained and mentored 6 junior team members while managing real-time problem-solving under pressure, resulting in improved team consistency and operational efficiency.

Deputy Manager

Aldi Stores Ltd, London, UK

October 2023 – August 2024

- Led data-driven bakery waste reduction project using linear regression and time series analysis in Python, achieving <1% daily pastry waste and significant cost savings.
- Managed cross-functional teams while implementing predictive modelling and inventory analytics to optimise retail operations.
- Developed automated forecasting systems for inventory management in a fast-paced environment.

Drinks Team Leader

Honi Poke Ltd, London, UK

March 2023 – September 2023

- Built stock inventory analysis system across 4 stores using data analytics and visualisation tools, delivering real-time KPIs and consumption insights.
- Reduced beverage costs by 70% through advanced data analysis and dashboard reporting.
- Created interactive dashboards to support data-driven decision-making.

Store Assistant

KDL Beverages Ltd, London, UK

December 2022 – March 2023

- Implemented daily sales forecasting models using linear regression, achieving a record 300% single-day sales increase.
- Optimised inventory and sales performance through predictive analytics.

Diagnostic Radiographer

Hospital Authority, Hong Kong

August 2018 – September 2022

- Delivered clinical imaging and data interpretation in a high-volume hospital setting, building analytical foundations for healthcare informatics.

Technical Projects

Flight Delay Prediction with MLOps (July 2025)

- Built scalable 93% AUC-ROC model using Pandas, NumPy, scikit-learn, XGBoost; end-to-end pipeline with target encoding, hyperparameter tuning, and SHAP explainability.
- Deployed real-time Streamlit app; identified key delay drivers.

Bank of England Base Rate Forecast (April–May 2025)

- Created polynomial regression model in Python; accurately predicted 0.25% rate cut ahead of MPC announcement.

Company Financial Performance Dashboard (July 2025)

- Designed Power BI dashboard with DAX for sales, segmentation, and profit analysis; delivered actionable insights.

Hotel Booking Cancellation Prediction (Kaggle) (September 2024)

- Developed TensorFlow neural network achieving 84% accuracy; supported by complex SQL queries on Google BigQuery.

Education

MSc Health Informatics

The Hong Kong Polytechnic University
2020 – 2022

- Graduated with Distinction (3.63/4.3 GPA) and Dean's Honours List.

BSc (Hons) Radiography

The Hong Kong Polytechnic University
2014 – 2018

Skills

Python (Pandas, NumPy, scikit-learn, XGBoost, Matplotlib) • SQL (BigQuery) • Machine Learning (TensorFlow, Keras, regression, classification, hyperparameter tuning) • MLOps & Pipelines • Power BI (DAX, dashboards) • Tableau • AWS & Azure ML fundamentals • Git/GitHub • Data Visualisation • SHAP Explainability

Certifications

- DataCamp: Data Analyst in Power BI
- DataCamp: Data Analyst in Tableau
- Microsoft: Train and Manage a Machine Learning Model with Azure Machine Learning
- Google: Generative AI Fundamentals
- AWS: Machine Learning Foundations
